January 31, 2011 --

USA Industries, Inc. has brought on The Baro Companies as a Manufacturer's Representative in the State of Texas.

The Baro Companies will be representing USA Industries' Snap It® Jr and Snap It® Sr Tube plugging system at Power Plants in the State of Texas.

The Snap It® Jr plugs are environmentally superior due to Positive Sealing with an Innovative Design and are proven with rated holding pressures up to **1,000 psid**. The Snap It® Sr plugs boast rated holding pressures up to **7,000 psig**.

No welding, No tube sheet damage, No Leaks, No worry. Use our complete line of plugging equipment in either Near or Far End applications. Through the tube plugging saves an enormous amount of time as the Channel Head or Floating Head covers do not have to be removed.

- Ease and quickness of installation
- Labor cost savings by reducing downtime
- Cost of installation and removal equipment is inexpensive and can be purchased or rented
- Plugs available in numerous sizes and materials

Lunch and Learn demonstrations are available with our experienced Sales Team. Contact USA Industries today to set up a **Lunch and Learn demonstration** at your facility.

If you are a **Power Plant Producer** in the State of Texas, you may contact Darren Webster at The Baro Companies at 281-561-0900.
